

Eindrücke der Teilnehmer "Engineering and Management across Cultures"

Irene Kleanthous, Cyprus University of Technology, Cyprus(2010):

"The Summer University was intensive. We had a full program in which we learnt German through different activities and we have been guided into the TUM and other institutes, laboratories and observatories. We also had some lectures and workshops on different subjects of engineering. The best part was our excursions

inside and outside of the city and the searching game through Munich. We experienced student life and culture in Munich and we had a wonderful time. I absolutely recommend it!!!!"

Oussama Laroussi, AUI, Morocco (2010):

"The summer university in München was a very interesting program. In fact we were many students from different cultures and we got the chance to know each other in a very friendly and nice environment. The activities, trips, seminar and most importantly German language course were amazing. Also the international office coordinators and tutors were very helpful and made our stay so smooth and enjoyable. I hope I would come another day to München."

Safia El Moutaouakil, AUI, Morocco (2010):

"This summer was a great opportunity for me to discover another part of the world. In fact, this summer program allowed me not only to learn but also to interact with new people from different places (China, Taiwan, Norway, Russia, Kazakhstan, Cyprus and Morocco) and to exchange various cultures. Moreover, this summer program allowed me to discover Germany and learn about its German people who are known by being 'pünktlich'. Indeed, this program was a melting pot and I really enjoyed the three weeks I spent in Germany."

Yarui Fu, Tongji University, China (2011):

"The Summer University gives me a great chance to know more about TUM and the city Munich, where I would like to pursue my Master Degree. The programme provides a wide range of activities, which can meet interests of different students. You can enjoy delicious BBQ by Isar, you can improve your German at language course, you can also see how cars are manufactured at BMW Plant The most important thing is that, this amazing mixed group lets

me personally experience very different cultures. I just learnt how to respect and how to adapt, which is very valuable in today's world. I strongly recommend you to participate this Summer University, it will give you a lifelong unforgettable memory and an amazing impression of TU Munich and the city."

Zhang Jinsu, Beijing Institute of Technology, China (2011):

"I attended Engineering and Management across Cultures 2011 and it's a really unforgettable experience. Munich is a great place for a visit and the program helped me to get to know more about TUM and how German students and professors are doing their research work. I met a lot of interesting people here and it's a great experience to get along with friends from all over the world using English, German and sometimes even Spanish and Chinese."

Zhang Zimeng, Beijing Institute of Technology, China (2011):

"It is not only a summer program but also a super-excellent opportunity to get to know Germany, Europe. You can learn how to think and do things in a different way. Here, both the extraordinary facilities, teachers and the real acquisition of inter-culture may impress you a lot."

Li Yunweini, Tsinghua University, China (2011):

"This program gave me a chance to have a glimpse of TUM's wonderful education conditions. It is definitely an honor if I can have my further study there. Of course, the Bavarian culture is fascinating and impressive. The 3 weeks in Munich will never fade from my memory. Thank you for your hard work for us."

Chen Han, Beihang University, China (2012):

"The chance to attend this program was very valuable for me. You will find everyone here is so outstanding. Here you can get not only the best knowledge but also the treasure of intercultural experience. If you are learning German, you will get the guidance from the best teachers. If you want to touch the leading edge technology in this world, lots of good lectures are waiting for you, and you will get a firsthand impression from the industry. The Intensive Seminar is my favourite! Beautiful

environment and a challenging task make it unforgettable. Every tutor is very kind and they will help you with every difficulty. Just come here!"

Shi Siyuan, Tsinghua University, China (2012):

"The life in Munich opened a completely new world for me. During the intensive program, I had a glimpse of wonderful studies made in TUM, as well as the fascinating culture and lifestyle in Germany. What's more, with students from different countries, I not only had a great time in Munich, but also knew more about the world. TUM is an ideal place for my further studies. I strongly recommend you to participate in the program."
